Project #14:   MONEYTALKS

Make Students Rich ~~Again~~.

Team:

Adriano Augusto
Grace Achenyo Okolo

Project repository: *https://github.com/nemo-91/moneytalks*

107 Datasets (each of ~80KB, ~1300 entries, 7 features):
each dataset captures the historical price movement
(on a 5 years basis) of one of the 107 stocks
composing the NASDAQ-100 index.

Goal 1:
Identify patterns in the stocks' prices movements.

Goal 2:
Draw general advices for the investors.

Goal 3:
Analyse the relation between *opening price* and
closing price of stocks, in terms of % change.

Goal 4:
Train and evaluate a classifier able to provide
BUY or *SELL* suggestions for investors.
